

UNIMET® 800ST

... worldwide safety for medical electrical equipment

UNIMET® 800ST

BENDER quality

For over 25 years, "BENDER Tester" has been a well-known term for quality and long life cycle in the area of fully automated electrical safety testers. "UNIMET®" became the brand name.

UNIMET® 800ST – compact design –
"Made in Germany", the portable
safety tester.

Unique in the global market

The first and only safety tester which automatically compares the "reference values" with later measurements according to the standards. UNIMET® 800ST allows to define your own test procedures. Device history protocols (log book) can be managed by means of the free add-on PC software.

Features

- The Windows user interface provides an easy-to-use solution
- Data exchange and memory via Control Center
- Automatic, semi-automatic and manual test sequences
- Data input via touch screen, keyboard or barcode scanner
- Visual inspection, electrical safety and functional test user-definable
- Test sequences user-definable
- Data memory > 10.000 data records
- Filter function for fast data selection
- Management of test dates
- Multitenancy
- Catalogue system
- Test probe with two switching contacts for semi-automatic testing of conductive parts not connected to PE

Standard-compliant

Standard compliant tests acc. to:

- IEC 60601-1, 3rd Edition (optional)
- IEC 62353:2007-05
- DIN EN 62353, VDE 0751-1:2008-08
- DIN VDE 0751-1:2001-10
- ÖVE/ÖNorm E 8751-1
- DIN VDE 0701-0702:2008-06

Standard-compliant measurements

- PE conductor resistance
- Insulation resistance
- Earth leakage current
- Protective conductor current
- Equipment leakage current
- Touch current
- Direct measurement method
- Differential measurement method
- Equipment leakage current-alternative method
- Applied part leakage current-alternative method
- Applied part leakage current AC and DC
- Patient auxiliary current AC and DC
- Applied part leakage current – mains voltage on F-Type

Wide variety of interfaces

- RS-232 interface
- USB port for printer, scanner, keyboard and USB stick connection
- PS/2 port for scanner and keyboard
- Network connection via Ethernet (optional)

Standard accessories

- Carrier bag of robust design and universal carrying concept
- Measuring lead with test probe
- Measuring lead with test clip
- Null-modem cable
- VK701-1 for testing extension cables
- Data transfer software UNIMET® Control Center

Service

- 36-month calibration interval
- 36-month warranty
- Software updates to be always up-to-date

Product series

UNIMET® 1100ST
The universal safety tester

UNIMET® 800ST
The safety tester for field engineering

UNIMET® 300ST
The safety tester for electrical beds and mobile electrical equipment
